ESD Consulting and Trading Ltd.

Professional seating solutions for
office and industrial applications

... Are you now building up your company office image and looking for a swivel chair what fits for your requirements? Do you like to replace your bored or used furnitures and chairs? Or simply just want to sit comfortably? Are you looking for an industrial chair what fully fits for your production enviroment? Do you appreciate the quality, reliability and excellent value for your money? Do you like if your investments serves your business interests for long term? Do you like the customized solution and to be unique? If you answered YES to all questions, then our company is the right choice!...

Why **ESD CONSULTING**

Professional seating solutions for your office and production environments

Our company has not only sales experience, but also user history in the field of industrial and office chairs. Knowing the marketplace and the diversity of customer requirements, the main goal is to offer our innovative solutions, fully meeting with customer demands. Typical trends of the 21st century such as a high degree of ergonomics and environmental awareness defines the criteria of an industrial or office chair. Our product selection will match all your requirements, whether it be an office swivel chair, an executive chair, a visitor chair, conference chair or working chair, ESD chair, cleanroom chair or laboratory chair. Our company also manufactures personalized office furniture. Our staff has over 20 years of professional experience which guarantees optimal service for our customers.

SEATING Ergonomics

Ergonomics is more than seating ergonomics. Ergonomics always takes the whole person into consideration. The chair means a lot, but the person means everything.

Ergonomics actually means the way in which work equipment, environment and workflow are adapted to human beings - both in the office and at the workstation. So ergonomics is the science of the best possible design of workplaces. Always central to all considerations about the "laws of nature" of work are human beings and their needs. So ergonomics is far more than the choice or the correct configuration of work equipment. It is applied human science used to benefit people, the company, and society.

The effectiveness of good chairs and active sitting is undisputed. We have been working to incorporate ergonomic insights and requirements into excellent products that make working and living in our chair-based society as comfortable and stress-free as possible. In doing this, chairs have been developed that set new standards in functionality, design, technology and comfort. It is our goal to achieve this, and at the same time it is also the prerequisite for our work.

Choose the right solution

Office lifestyle

We understand that work can be incredibly diverse – that's why our range of chairs is just as varied. Every office seating solution from ESD Consulting combines two characteristics. On the one hand, it is a tool which is specially tailored to a specific requirement. On the other hand, our seating solutions protect the most important resource of all – the people using them. They support the body perfectly in every position and have a positive impact on productivity. Sitting on an Interstuhl chair is always a true pleasure; whether it is in a reception area, at a desk, or in an area for communication or even regeneration. Our desire is to give all forms of work more value by creating well-designed chair innovations. An Interstuhl chair is always a companion which not only looks good, but “sits right” too.

Industrial lifestyle

Workplace chairs are the result of passion and a solution-focused mindset. Our aim to make life in the workplace that little bit better every day – whether it is through application-specific ergonomic concepts for industry and laboratories, through outstanding design which motivates employees and expresses appreciation or through actively assuming social and ecological responsibility in the production of chairs. Our portfolio is divided into five areas: production, ESD, laboratories, cleanrooms and standing work. We provide highly specialized, application-appropriate, user-friendly seating solutions with flexible adjustment options for all of these fields.

Products and Brands

Brands that leave nothing to be desired

Our three brands, **Interstuhl**, **Bimos** and **Prosedia**, together represent the strength of our company. With different approaches and objectives each of these brands commands a leading market position in its own area. The different positions of the individual brands demonstrate the close communication with the markets.

Interstuhl brand covers all types of seating needs for the office. The products range from seating solutions for reception and waiting areas to office workspaces to communication areas and areas for regeneration. Interstuhl paves the way for successful communication between colleagues when it's time to come out from behind the desk. Interstuhl seating solutions combine innovative, sophisticated engineering performance with surprising aesthetics for all the senses and maximum ecological, economical and ergonomic efficiency.

Bimos is the leading brand for top-quality industrial and laboratory chairs in Europe. The Bimos brand comprises highly specialized, high-performance seating solutions for work in production, in the lab, in cleanrooms, at ESD workstations and for standing work. We see a chair as the link between people and production. All of our seating solutions are perfectly tailored to the relevant application and the individual ergonomic challenges of the activity in question.

Prosedia is positioned to offer its customers an especially fast delivery, well-developed ergonomics and high quality at an unbeatable price. That is why Prosedia does not offer additional configuration options or too many models to choose from.
