**Champ**

Whoever understands more about seating creates the perfect place for anyone.

Second and third generation managing directors: Helmut, Werner and Joachim Link (left to right)

#### Interstuhl

The idea of a Swabian businessman and developer is embarking on an international journey. It's all about attractive and healthy seating, whether we use it to work, think, discuss, argue or relax.

It's all about a chair that actively supports us at what we are doing.

Interstuhl innovations are conceived, tested and developed in an interesting mix of think-tank and expert laboratory. That is what makes us so unique. Simply stated by Werner Link, the company's owner and Managing Director: "We understand more about sitting". An honest statement that has its origins back in 1961 when the assignment was to create relaxing seating for the workers of a textile factory. The focus ever since has been on expertise and

a genuine interest in our products and the people who use them. We remain true to the spirit of our brand by collaborating with leading institutes on the scientific development of our products. This has resulted in a collection that is unparalleled in its breadth and depth. He who understands more about sitting, has studied it in detail. Interstuhl is such a company and will remain so: a world away from corporate affiliations and concerns about globalization. Over 600 employees craft exclusive German goods and they do so in Germany.

Anyone who understands more about sitting should rise up. Rise above the tired old clichés about quality and materials. Interstuhl is what it is, and what it is is very good.

1062

Champ. The elegant design, the segmented upholstery, the new mechanics: a sure-fire winner of a product design for the new office swivel chair, which has many segments and conquers one thing for sure: Champ is the model found in sophisticatedly furnished offices and heavily characterised by its low-key individuality. It does not tolerate any overloading. It needs space as an object and work facilitator. Champ is equipped with a new recognisable technical concept and offers an innovative sitting solution: New lightness and distinctiveness accentuate the high value of the item.

Optically, Champ is a slim, distinct, androgynous type. Its upholstery segments accentuate its design and identify the different backrest heights at the same time. Champ is a new product concept with new technology for an extraordinary

feeling when sitting – the “Bodyfloat”. When you sit down, the seat floats down and moves backwards. This innovative connection of the backrest makes it possible to achieve an unequalled and delicate aesthetic and lightness of the

mechanical block. People with formal demands will look at office swivel chairs in a whole new light and be able to feel the uniqueness of Bodyfloat.

Champ swivel chairs are available in three different heights. The segments proportion the chair heights. As a whole spatial concept with low design, medium-high in two designs and high office swivel chair. The innovative Body-Float synchronous mechanism gives Champ a distinctive appearance. The revolutionary technology creates a feeling of gliding wave motion when you sit down and lean back.

Champ as a conference chair and cantilever chair, also with backrests in three heights, rounds off the collection's concept for integrated furnishings. A distinct detail of the cantilever chair: the armrests are connected in a continuous line. The upholstery in red is one of many colours and fabric / leather collections available for Champ.

The first swivel chair with front cantilever seating edge: new, distinctive design.

The front cantilever seating edge makes it possible to find a comfortable adjustment of the seating incline. The innovative suspension on the rear seating area means the seating height no longer has to be manually adjusted, just like the height of the lumbar support when the incline is adjusted.

Body-Float synchronous mechanism: the body glides into a gentle rear flow movement. The new mechanism covers a wide weight spectrum from 45 – 140 Kg.

The swinging and dynamic form of the ring-shaped armrest supports the elegant character of the series

All control levers are positioned so that they can be intuitively reached. The handwheel provides fine adjustment of the individual Body-Float synchronous mechanism reset force.

Lumbar support with air-pressure technology

T-shaped armrests, 4D adjustable in height, width and depth, swivel-mounted, 2D T-armrest adjust, in width and height

The Astiv active seat depth adjustment effectively extends the seating area and the seating area for the thighs. The base of the backrest remains unaffected.

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preven-

tive medicine and eases the pain for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new

philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

"You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

- 1** Body-Float synchronous mechanism

Through the gentle floating movement of the seating area and backrest, the body is supported brilliantly in any position. The mechanism covers a wide weight spectrum of 45 – 140 Kg
- 2** Sprung column

This ensures that the spine, which is very sensitive to vertical jolts, is not subjected to excessive loads when sitting down, even at the lowest seat height.
- 3** Weight adjustment

The individually adjustable counter-pressure of the backrest permits correct sitting for both light and heavy users.
- 4** Backrest height adjustment

The support range for the lumbar spine can be ideally adjusted to the height of the user.
- 5** Seat inclination adjustment

Multiple adjustment of the seat in a forwards direction stops the pelvis from tilting back. This relieves the spine and avoids a poor posture.
- 6** Seat depth adjustment astiv

Regulates the distance between the backrest and front edge of the seat, thus providing optimum support for the upper thighs; even for taller users. When adjusting the astiv setting, the back remains in the same position.
- 7** Adjustable lumbar support

The horizontally adjustable lumbar support adapts to the individual curve of the lumbar spine; this reduces the muscle strain.
- 8** Headrest

The neck and shoulder muscles are relieved by the headrest when you lean back.

## Premium products

Often the word innovation is more of an obstacle than a useful coordinate – all too often inflated claims and abuse of the term for purely promotional reasons obscure the distinction between real innovation and the purely derivative. This is why we are particularly pleased that customers can now not only experience the quality of our products, they can see it too: we are the first manufacturer to be granted the right to label our products with the official “Premium Product” seal, awarded by the LGA testing company and TÜV Rheinland Group certification body. In addition, we have won yet another accolade: the best “Quality Office”. Put simply, every Interstuhl product provides a premium sitting environment and all owners of Interstuhl chairs can rest assured that they have chosen the best possible product. This has a positive impact on the person as a whole and their entire working day. Knowing this, we are more than happy to issue a 5-year guarantee. We share the praise for our innovative seating solutions with the research institutes that are always ready to support our developments and think we’ll keep doing things this way.

### Quality Office

Awarded by the Verband Büro-, Sitz- und Objektmöbel e.V., the German Standards Institute (DIN), the Verwaltungs- und Berufsgenossenschaft, INQA Büro, Initiative neue Qualität der Büroarbeit, and the Federal Institute for Occupational Safety and Health.

Produkt-Design: Andreas Krob, Joachim Brüske © Interstuhl.

Andreas Krob is an industrial designer. B4K was founded with his wife Uta Krob in 2001. The office stands for sensitive design of demanding and innovative tasks from the design and architecture fields. The furniture speaks an individual language of form and each single piece is unique in its character. With Champ, an office swivel chair was created, which brings specific, technical innovation together with classic, long-lasting design into sophisticated rooms of communication.

The product design for Champ was realised in cooperation with Joachim Brüske. Joachim Brüske took charge of the technical management in developing the new mechanism.
