- Soft double castors for hard floors or glides

156GW

**Goal FlexoBalance.** A new feeling that takes the rigidity out of sitting. Together with the synchronous mechanism, Goal FlexoBalance allows the seat to move in further directions, providing an active, ergonomic sitting experience. The freedom of movement in every direction improves the circulation, stimulating the blood supply to the intervertebral discs and back muscles. The active seat mechanism can easily be deactivated if required.

The FlexoBalance can be locked with a handle if required.

The seat is controlled by the sitter's own body movements, following them in every direction.
