Mitos

Whoever understands more about seating creates the perfect place for anyone.

Second and third generation managing directors: Helmut, Werner and Joachim Link (left to right)

Interstuhl

The idea of a Swabian businessman and developer is embarking on an international journey. It's all about attractive and healthy seating, whether we use it to work, think, discuss, argue or relax.

It's all about a chair that actively supports us at what we are doing.

Interstuhl innovations are conceived, tested and developed in an interesting mix of think-tank and expert laboratory. That is what makes us so unique. Simply stated by Werner Link, the company's owner and Managing Director: "We understand more about sitting". An honest statement that has its origins back in 1961 when the assignment was to create relaxing seating for the workers of a textile factory. The focus ever since has been on expertise and

a genuine interest in our products and the people who use them. We remain true to the spirit of our brand by collaborating with leading institutes on the scientific development of our products. This has resulted in a collection that is unparalleled in its breadth and depth. He who understands more about sitting, has studied it in detail. Interstuhl is such a company and will remain so: a world away from corporate affiliations and concerns about globalization. Over 600 employees craft exclusive German goods and they do so in Germany.

Anyone who understands more about sitting should rise up. Rise above the tired old clichés about quality and materials. Interstuhl is what it is, and what it is is very good.

Mitos is like taking a seat in a whole new feeling. A feeling of floating in gentle movements, of letting every movement discreetly bounce, swinging smoothly. You feel free, slide backwards and forwards and are invited into a healthy, continuous movement. Imperceptibly. Mitos is pure relaxation, whilst you are thinking and working. Mitos is a movement which conveys strength from its relaxation and stimulates, inspires, prepares you for challenges and at the same time ergonomically supports you superbly.

Why? Mitos lightly bounces due to the Transmotion synchronous mechanical system and at the same time conveys the feeling of floating. Each movement is as light as a feather, some thoughts

are definitely as well. The relaxation position makes it possible to completely relieve all strain due to an extremely big beam width of 130°. Your thoughts are free.

The Transmotion synchronous mechanical system was developed to be able to reproduce the most natural movement possible and at the same time support the body in its ideal position: the whole seat moves backwards and downwards on a curved track; the seat and backrest adjust their angle in a defined ratio to each other.

With 130° Mito offers a significantly larger open angle than conventional office chairs. When you lean back the headrest moves at the same time in the opposite direction to the backrest and also supports the head in the furthest back seat position, for example when reading; at the same time the headrest moves forwards to also relieve the neck in the furthest reclined position.

Conference and visitor's chairs comprehensively complete the collection. Features are the mesh back designs and the moveable backrest, which pleasantly adjusts to the angle of inclination when you recline.

Two objects are all you need for the whole office fittings. The versatile use of the mobile, the characteristic accompaniment to the swivel chair, enables flexible adjustable working positions.

902M

1. Relaxed working and reclining. The headrest moves in the opposite direction to the backrest and also supports the head in the furthest back sitting position. The armrests can also be rotated by 180° to create a supporting surface for the upper arms, which effectively relieve the pectoral girdle and the shoulder and neck muscles. The relax button reduces the spring tension of the backrest for long, reclined and relaxed sitting. The strain on intervertebral discs is reduced to a minimum.

2. Put your feet up. Mobile with foot rest and table. The mobile is everything in one.

3. Swivelled, the mobile becomes a visitor's chair.

4. By folding up the armrests into a vertical upright position a lectern is created in no time at all.

The special Mito armrests are rotational and height adjustable. Another ingenious function is the 180° inclination upwards. The upper arms have a continuous, sloping support surface which relieves the shoulder area and neck

The headrest moves in the opposite direction to the backrest and also supports the head in the furthest back sitting position. Ideal e.g. when reading

Lots of technology, visually reduced into a shapely control lever: relax button, weight adjustment, seat height adjustment

The relax button reduces the spring tension of the backrest. You can sit in a reclined position for a long time without any effort

The next position is the best

From the seating specialists

Fact: from an anatomical point of view ergonomics means movement because movement is a critical part of office health. It is a law of nature that effective work processes are one of the most important sources of value-added in the company. Back problems are the greatest causes of absenteeism. A good chair will not heal your back but it is good preven-

tive medicine and eases the pain for those who already suffer. What does an Interstuhl chair do? The patient therapist offers support in each posture. It generates a feeling of well-being in all positions and brings measurable relief.

Naturally, the courage to follow our philosophy of dynamic sitting has meant a break with all the old rules: majestic, immaculate and bolt upright vs. the new

philosophy of doing it with gusto, reclining, lounging, looking out the window, concentrating.

"You can sit however you want. Just sit on the right chair." Each new product development with leading research institutes reconfirms this and it is substantiated by scientific input. The result: Interstuhl chairs accommodate every posture so ergonomically that maximum support is ensured.

Premium products

Often the word innovation is more of an obstacle than a useful coordinate – all too often inflated claims and abuse of the term for purely promotional reasons obscure the distinction between real innovation and the purely derivative. This is why we are particularly pleased that customers can now not only experience the quality of our products, they can see it too: we are the first manufacturer to be granted the right to label our products with the official "Premium Product" seal, awarded by the LGA testing company and TÜV Rheinland Group certification body. In addition, we have won yet another accolade: the best "Quality Office". Put simply, every Interstuhl product provides a premium sitting environment and all owners of Interstuhl chairs can rest assured that they have chosen the best possible product. This has a positive impact on the person as a whole and their entire working day. Knowing this, we are more than happy to issue a 5-year guarantee. We share the praise for our innovative seating solutions with the research institutes that are always ready to support our developments and think we'll keep doing things this way.

Quality Office

Awarded by the Verband Büro-, Sitz- und Objektmöbel e.V., the German Standards Institute (DIN), the Verwaltungs- und Berufsgenossenschaft, INQA Büro, Initiative neue Qualität der Büroarbeit, and the Federal Institute for Occupational Safety and Health.

Product design: Struppler Industriedesign, Andreas Struppler.

The designer established his studio in Munich in 1992. Today Andreas Struppler works with a team of engineers, designers and graphic designers for numerous national and international customers. His design focus is in the field of office furniture systems and seating, as well as lights, lighting, bathrooms, tableware and home furniture.
