Nimbos

Autofit-synchronous mechanism adjusts to your weight. Individual fine adjustment to match your seating habits.

Flyweight up to 50.802 kg  
Bantamweight up to 53.525 kg  
Featherweight up to 57.153 kg  
Lightweight up to 61.235 kg  
Welterweight up to 66.678 kg  
Middleweight up to 72.574 kg  
Light-heavyweight up to 79.378 kg  
Heavyweight with no limit

The first time you take a seat on Nimbus you will probably think: Made just for me. There's no better way to experience the convincing features of the Autofit-synchronous mechanism: the movements of the seat and backrest adjust to your weight. Discreetly, precisely and without you having to do a thing. As if it were made just for you. (And for anyone else who takes a seat on Nimbus.)

152N

152N

Nimbus adapts to different surroundings just as easily as to changing users. Its unobtrusive, timelessly clear lines and the variety of colours and materials that are available harmonise with almost every Corporate Design; the models range from the reception to the manager's office and from waiting room furniture to conference rooms.

If you value inner qualities, you will also appreciate the outer appearance.

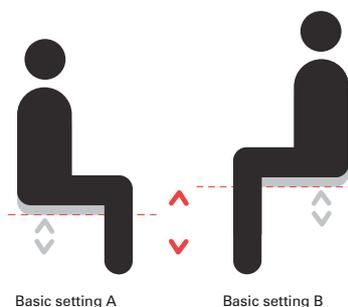

560N

152N

Not to mention the free choice between several bases and a whole series of optional extras: Nimbos comes up to your expectations, and doesn't cost more than you can afford. Our contribution to cost optimisation in these times of tougher competition.

Even if you don't sit as you should,  
you should at least sit as best you can.

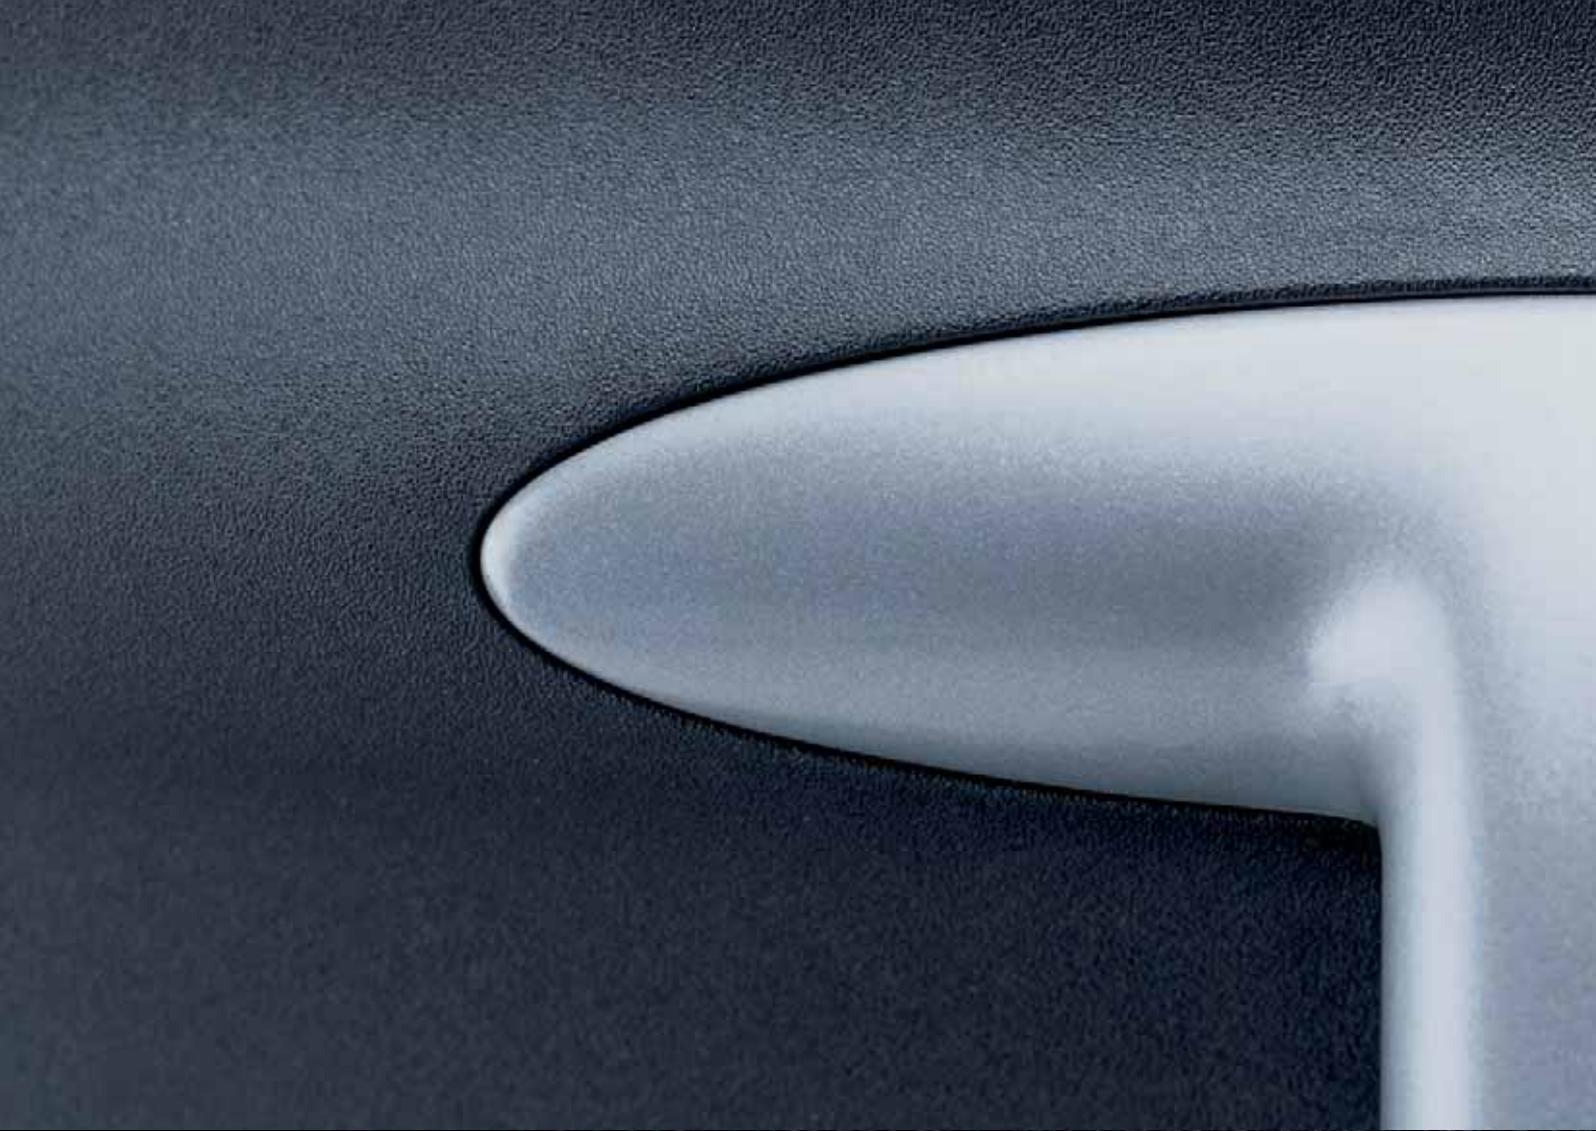

Basic setting A

Basic setting B

An intelligent solution:  
the basic seat height  
adjustment significantly  
increases the useful seat  
height range both up-  
wards and downwards.

Some people prefer to fiddle  
about until they find the right  
setting for their chair and then  
never lay a finger on it again.  
Others would prefer to change  
their chair's setting every  
time they have a change in work  
or mood.

Nimbus fulfils both expectations. All parameters that  
affect the seating habits can be individually adjusted  
quickly and easily: seat height, seat tilt and seat depth,  
the lumbar support, height of the backrest, armrests, etc.  
Even the characteristics of the Autofit-synchronous  
mechanism can be varied at random between athletically  
hard and comfortably soft. Five times a day, if you want.  
Or once every five years.

Air-Pressure-Technology  
for the simple and  
exact adjustment of the  
lumbar support.

152N

560N

152N

The longer you sit on Nimbos, the more you will come to value the things that you can't see or understand at first glance. For example, the fact that the air-filled lumbar support easily clings to the shape of your body. Or the even distribution of pressure on the thighs – with Nimbos this is also supported by the active seat depth adjustment that really does enlarge the size of the seat.

If you spend all day looking at the clock to see how long you have until knocking-off time, then perhaps it's time you simply changed your chair.

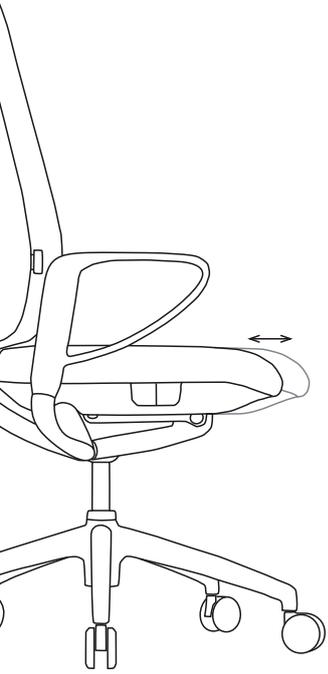

Not to mention the great care taken choosing the materials used and in the workmanship. This gives you the sense of security that in one years time – or in two, four, five or six years time – you will still be sitting on Nimbos just as comfortably and stress-free as on the very first day.

570N

For tall users: thigh relief through active seat depth adjustment.

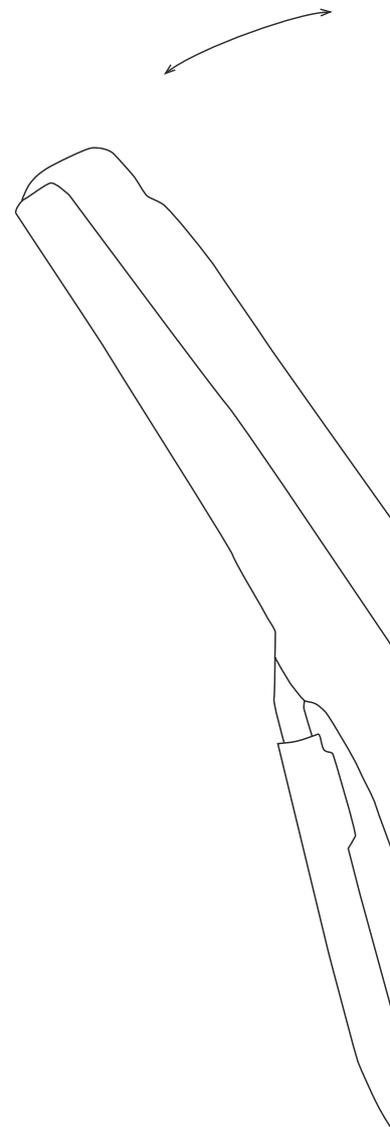

The adjustable seat tilt supports anatomically correct sitting even with a forward tilting working posture.

Seat depth

Seat tilt

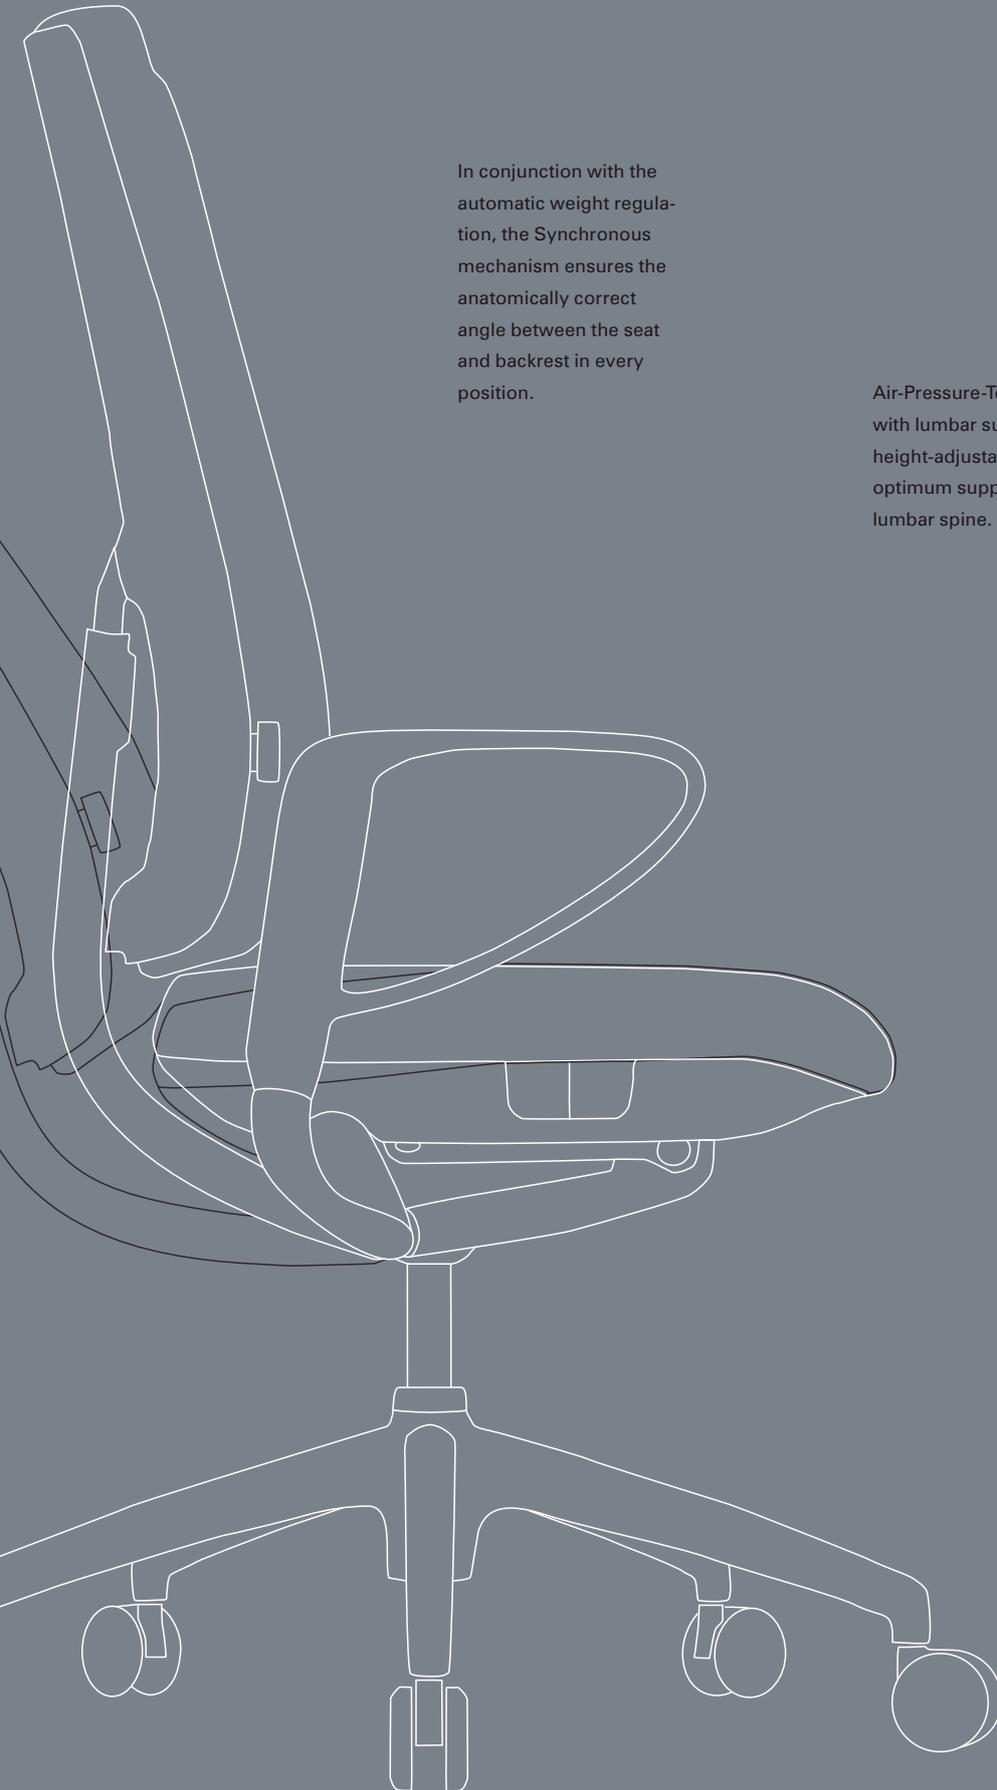

Don't judge Nimbos by what it costs  
but by what it does for you.

In conjunction with the automatic weight regulation, the Synchronous mechanism ensures the anatomically correct angle between the seat and backrest in every position.

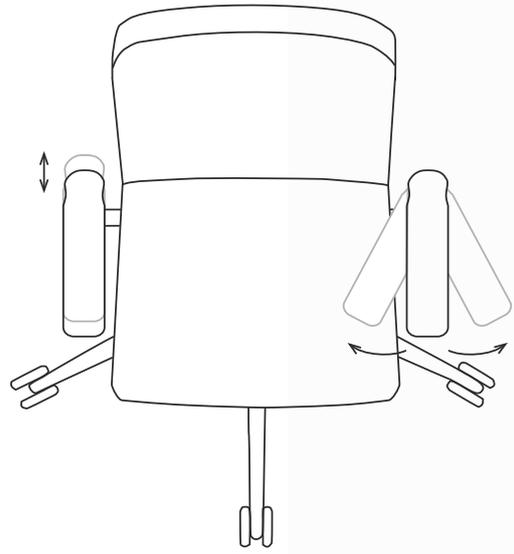

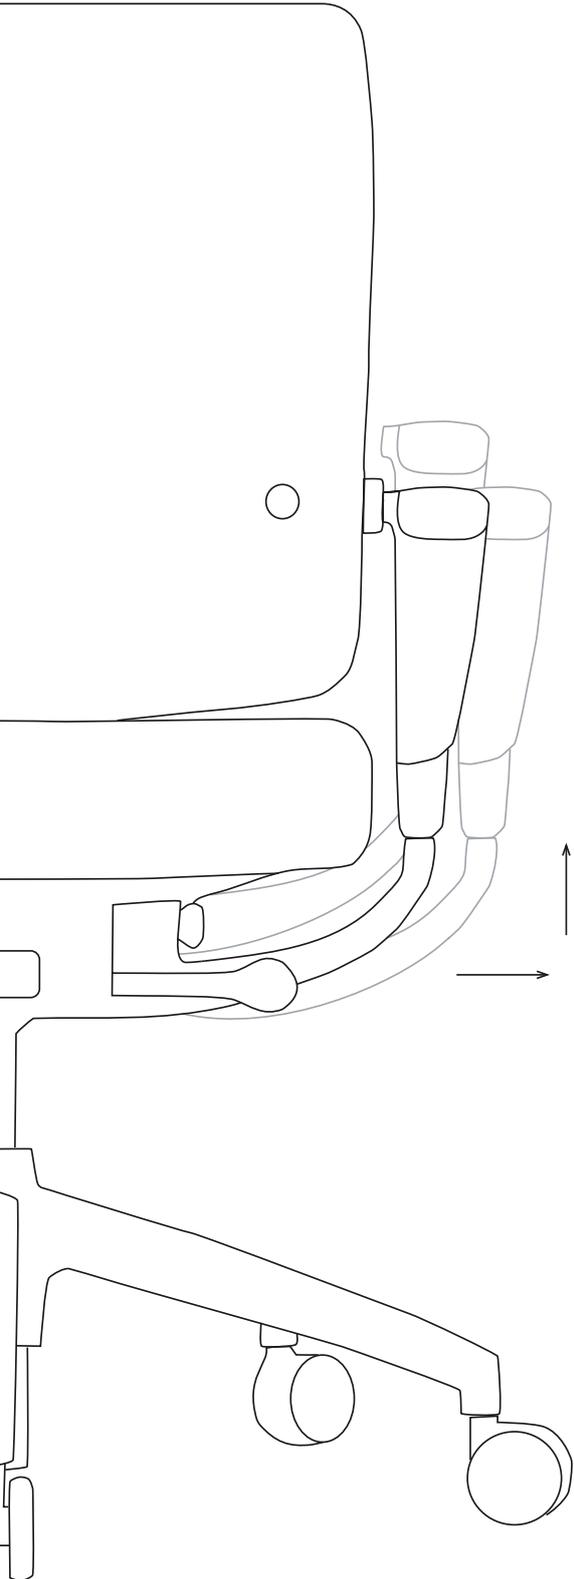

Air-Pressure-Technology with lumbar support plus height-adjustable: optimum support for the lumbar spine.

Height and width-adjustable ring armrests with soft arm-pads

Height, width and depth-adjustable armrests with soft arm-pads, pivoted

You don't have to love technology to appreciate the technical features of Nimbos. Or to be more precise, how effectively these serve their purpose. Because more important than the technology itself is how it helps increase your performance or that of your employees.

Environmentally friendly production and ecologically perfect products are a trademark of Interstuhl and also took top priority when developing Nimbos. The Environmental Management System at Interstuhl meets the requirements of DIN EN ISO 14001; our Total Quality Management has been certified in accordance with DIN EN ISO 9001 since 1993.

All models in the Nimbos range come with an Interstuhl long-term warranty of five and a full warranty of three years.

152N  
Backrest height 60-66 cm

- ▶ Black plastic base
- ▶ Autofit-synchronous mechanism with automatic weight regulation and fine adjustment
- ▶ Basic seat height adjustment
- ▶ Backrest height adjustment (locking mechanism)

optional:

- ▶ Aluminium base black, brilliant silver or polished
- ▶ Adjustable seat inclination
- ▶ Seat depth adjustment (active)
- ▶ Adjustable lumbar support (Air Pressure)
- ▶ Mechanical sprung column
- ▶ Adjustable armrests
- ▶ ESD conductive fabric

560N  
Cantilever model  
with plastic backrest

- ▶ Tubular steel frame black
- ▶ Arm pad plastic

optional:

- ▶ Tubular steel frame brilliant silver or chromed
- ▶ Felt glides for hard floors

570N  
Cantilever model  
with upholstered backrest

- ▶ Tubular steel frame black
- ▶ Arm pad plastic

optional:

- ▶ Tubular steel frame brilliant silver or chromed
- ▶ Felt glides for hard floors
